170-CSH (RICHARDSON): The structure of C-S-H

172-EDM (SARJA): Environmental design methods in materials and structural engineering

175-SLM (LACASSE): Computer bases on service life methodology

176-IDC (SETZER): Internal damage of concrete due to frost action

177-MDT (BINDA): Masonry durability and on-site testing

178-TMC (ANDRADE): Testing and modelling chloride penetration in concrete

179-CSD (MÜLLER): Data bank of concrete creep and Shrinkage

180-QIC (TAMAS): Qualitative identification of clinker and cement

181-EAS (BENTUR): Early age shrinkage induced stresses and cracking in cementitious systems

182-PEB (PARTL): Performance testing and evaluation of bituminous materials

183-MIB (RIBAS SILVA): Microbial impacts on building materials - Weathering and conservation

184-IFE (SEIDLER): Industrial floors for withstanding harsh environmental attacks, including repair and maintenance

ARP (NIXON): Alkali-reactivity and prevention - Assessment, specification and diagnosis of alkali-reactivity

ATC (REINHARDT): Advanced testing of cement based materials during setting and hardening

CSC (SKARENDAHL): Casting of self-compacting concrete

FHP (MARCHAND): Predicting the frost resistance of high-performance concrete structures exposed to numerous freezing and thawing cycles

ISA (SKALNY): Internal sulfate attack

LPC (MANGAT): Long term performance characteristics of fibre cement composites

NDE (WIGGENHAUSER): Non-destructive evaluation of concrete elements - updated methods

NEC (TORRENT): Non-destructive evaluation of the 'covercrete' (concrete cover)

QFS (BAZANT): Size effect and scaling of quasibrittle fracture
SBJ (WOLF): Service life prediction of sealed building and construction joints
SOC (PLANAS): Experimental determination of the stress-crack opening curve for concrete in tension

5.2 CC Counsellors

Assignments

According to our Statutes, the Coordinating Committee (CC) is responsible for overall coordination and monitoring of the work and the outputs from the Technical Committees (TCs). The CC shall take initiatives for actions deriving from the results, such as assuring transfer of relevant information to target groups. The CC normally has a membership of seven. CC members are called counsellors, according to their mission.

Each CC counsellor will:

- supervise the programme, activity and general efficiency of 4 to 10 TCs
- establish direct contacts with TC chairmen in order to remind them of their role and to ask for specific papers in their TC's field for the Journal, *Materials and Structures*
- gather information from the TCs
- evaluate the TC work once a year (CC-N39 item 3 should be answered by the counsellor)
- produce a sectorial survey once a year
- identify any difficulty or problem in the work of the TCs
- participate in CC meetings twice a year - attendance at least once a year is a minimum requirement
- have the responsibility to propose the assignments of numbers to the TCs (only once for each TC during its lifetime)
- know the specific public proposals and meetings in his sectorial field
- be encouraged to attend one event of each assigned TC during his five-year term of office
- be expected to review the final documents of their assigned TCs before they are submitted for publication.
